PREFACE

British Columbia Government Publications 1982 is the first annual cumulation of the British Columbia Government Publications Monthly Checklist, which has been published since 1970. The listing includes documents published by the Legislative Assembly, government ministries, crown corporations, boards and commissions. Publications received in the Legislative Library during 1982 are included even though they may have a 1981 or earlier date of publication. These may include out-of-print items photocopied for the Library's collection. However, publications with an imprint date earlier than 1970 are excluded. Also excluded are internal documents, press releases and maps. Separate sections list periodicals received in 1982 and periodical titles which have ceased publication.

British Columbia government publications are available from the issuing agency rather than being distributed from a central source. They are not available from the Legislative Library. No attempt has been made to determine whether items are still in print and all availability information has been deleted from these entries (except in the periodical cumulation). This information appears in the monthly checklists, which should therefore be retained after the annual has been published.

The 'Restricted distribution' note accompanying entries indicates public documents which were not prepared in sufficient quantity for general distribution. Such publications may not be ordered from the issuing agency. In some cases photocopies may be obtained through Inter-Library Loan from the Legislative Library on a per-page charge basis.
